

# INSULATED BOX LINERS

## ***Protect Your Products with our Economical, Custom Fit, Insulated Box Liners***

Cellofoam understands protective packaging and the challenges associated with shipping. Our high-quality, expanded polystyrene (EPS), insulated box liners are an efficient and economical way to thermally control products in boxes and help protect them in transit. Our insulated box liners are custom, hot-wire cut in six panel sets to meet your individual needs, from fitting your box to adjusting wall thickness or density to meet thermal protection requirements. Helping to streamline your operations, Cellofoam insulated box liners may be provided as either partial or complete packaging solutions with set-up corrugated boxes, liners, and/or Perma Cool® Gel Packs. Our box liners are produced with short lead times, require no tooling costs, are very compact to store, and are ideal for low volume applications.

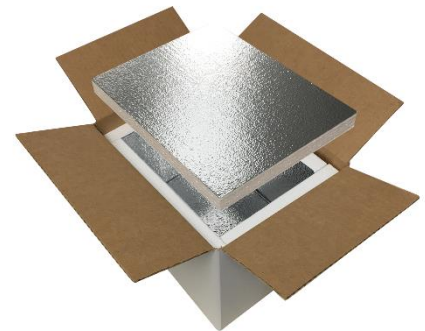

Cellofoam high-quality EPS insulated box liners are made of premium expanded polystyrene rigid insulation that meets or exceeds ASTM C578, *Standard Specification for Rigid, Cellular Polystyrene Thermal Insulation*. The EPS is composed of closed cells with excellent compressive and flexural strength that protects your package from shock and thermal damage during shipment. In addition to plain foam, box liners may be ordered with heat laminated polymeric facers on one or both sides for added strength and durability. These options include clear or metalized, reflective polypropylene, the latter which may increase thermal protection.

In addition to box liners, Cellofoam offers a wide variety of other cold chain products including custom designed and molded shippers as well as the extensive Perma Cool® product line of standard size, two-piece, molded EPS shippers.

### **ADVANTAGES**

- **Economical and lightweight thermal protection**
- **Lower cost than molded shippers; no tooling costs**
- **Saves storage space vs molded shippers; Short lead times**
- **Custom manufactured to almost any size, thickness, and density; Multiple facer options available**
- **Protects your products from shock, impact, vibration, and thermal damage during shipment**
- **Environmentally friendly:** 100% recyclable, has recycled content, and contains no formaldehyde or ozone-depleting CFCs or HCFCs.

### **APPLICATIONS**

- **Food Service & Markets**
- **Perishable Food Shipping**
- **Mail Order Business**
- **Biotech**
- **Pharmaceuticals**
- **Non-cold chain product protection**
